

Assignment: Basic Linux Commands

Instructions

1. Perform all tasks using the Linux terminal.
2. Take screenshots of important outputs.
3. Submit the commands used along with their outputs.

Part A — Directory Navigation

1. Display the current working directory using `pwd`.
2. List the contents of the current directory using `ls`.
3. Display hidden files using `ls -la`.
4. Navigate to the `/tmp` directory.
5. Return to your home directory using `cd`.
6. Navigate to `/etc` and display its contents.
7. Return to your home directory using a relative path and then using `cd ~`.

Part B — Creating Files and Directories

8. Create a directory named `Linux_Assignment`.
9. Inside `Linux_Assignment`, create the following directories: `Documents`, `Scripts`, `Backup`, `Logs`.
10. Create three empty files inside `Documents`: `file1.txt`, `file2.txt`, `file3.txt`.
11. Create a file named `system_info.txt` inside `Linux_Assignment`.
12. Display the directory structure using an appropriate command.

Part C — Working with Files

13. Add the following information to `file1.txt`: Name: <Your Name>; Course: <Your Course>;
Operating System: Linux.
14. Display the contents of `file1.txt`.
15. Copy `file1.txt` to the `Backup` directory.
16. Rename `file2.txt` to `linux_commands.txt`.
17. Move `file3.txt` from `Documents` to the `Backup` directory.
18. Create a new file named `commands.txt` and add at least 10 Linux commands to it.
19. Display the contents of `commands.txt` using `cat`.
20. Display the same file one page at a time using `less`.

Part D — Viewing and Searching Files

21. Display the first 5 lines of `/etc/passwd`.

22. Display the last 5 lines of `/etc/passwd`.
23. Count the number of lines, words, and characters in `commands.txt`.
24. Search for the word `Linux` in `file1.txt`.
25. Search for all files with the `.txt` extension inside `Linux_Assignment`.
26. Find all files named `file1.txt` starting from your home directory.
