

Windows Lab 5

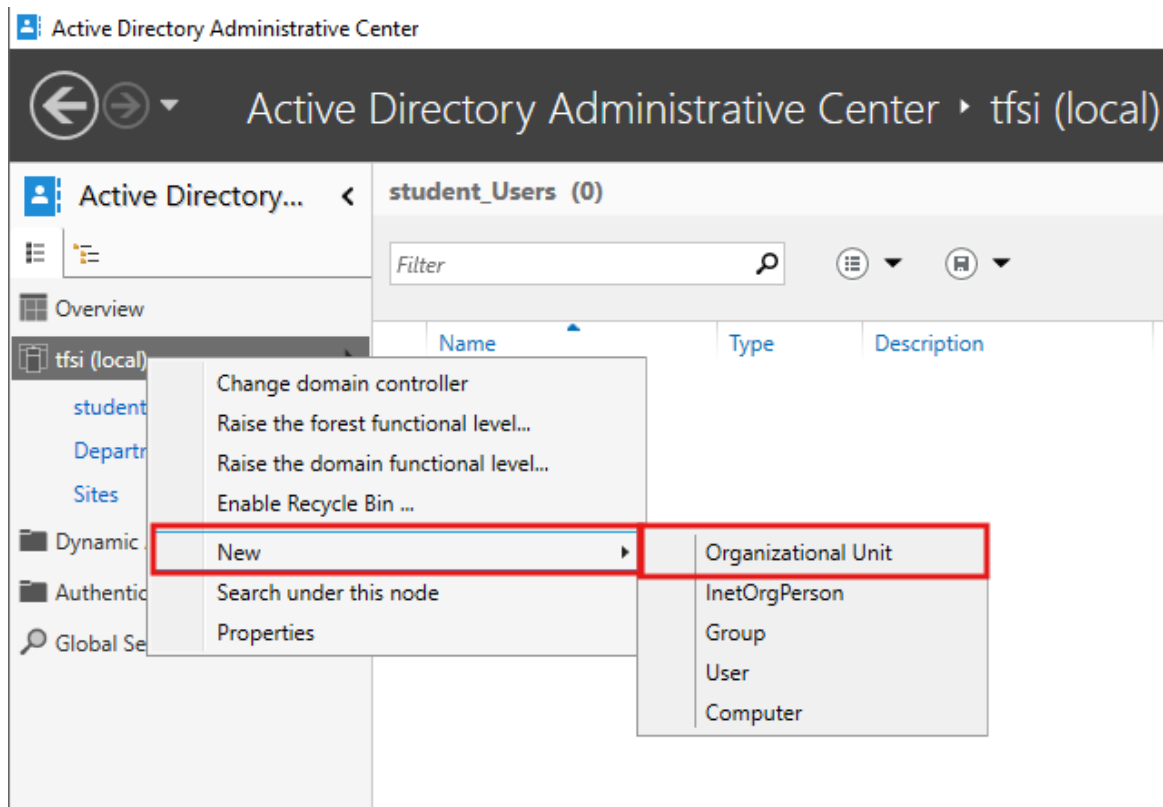

By Jai Pandey (260840140011)

Question 1

Open Server Manager > Tools > AD Admin Center

In the local domain, right click and select New > Organizational Units

Enter the name of the Organizational Units (OU)

Create Organizational Unit: student_Users

Organizational Unit

Managed By

Name: * student_Users

Create in: DC=tfsi,DC=com Change...

Description:

Address:

Street

City State/Province Zip/Postal code

Country/Region:

Protect from accidental deletion ☒

student_Users

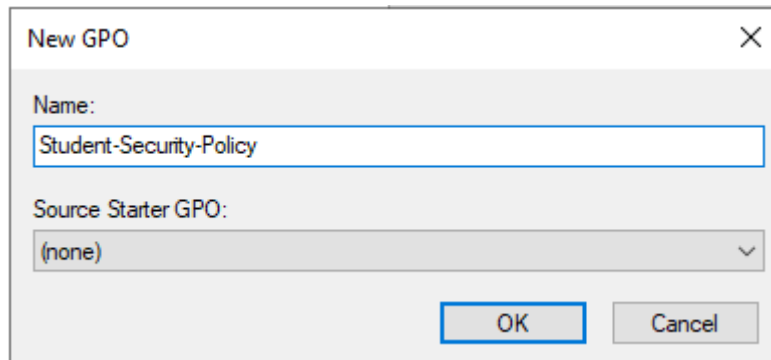

Users

Name	Type	Description
student1	User	
student2	User	

Now create a GPO in the “student_User” domain

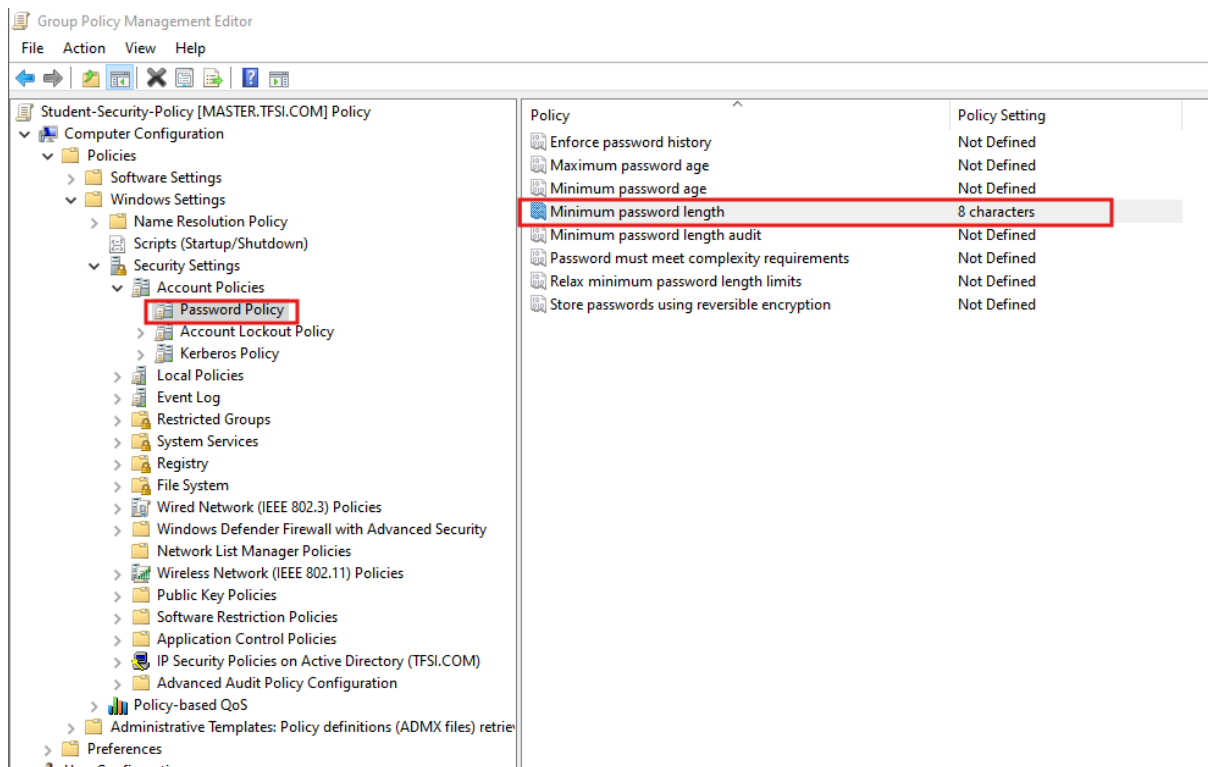

Name the GPO

Now Right click the GPO Policy and click on edit.

For all “Password Policies” go to Computer Config > Windows settings > Security Settings > Account Policies > Password Policy

Here set all the Password related policies.

All the Password related policy changes

Policy	Policy Setting
Enforce password history	Not Defined
Maximum password age	60 days
Minimum password age	59 days
Minimum password length	8 characters
Minimum password length audit	Not Defined
Password must meet complexity requirements	Enabled
Relax minimum password length limits	Not Defined
Store passwords using reversible encryption	Not Defined

For Account Lockout Policies. Navigate to
Computer Config > Windows settings > Security Settings > Account Policies > Account
Lockout Policy

Group Policy Management Editor

File Action View Help

Navigation icons: back, forward, home, search, help, refresh, print

Personalization

Prevent changing desktop background

Edit [policy setting](#).

Requirements:
At least Windows 2000

Description:
Prevents users from adding or changing the background design of the desktop.

By default, users can use the Desktop Background page in the Personalization or Display Control Panel to add a background design (wallpaper) to their desktop.

If you enable this setting, none of the Desktop Background settings can be changed by the user.

To specify wallpaper for a group, use the "Desktop Wallpaper" setting.

Note: You must also enable the "Desktop Wallpaper" setting to prevent users from changing the desktop wallpaper. Refer to KB article Q327998 for more information.

Also, see the "Allow only bitmapped wallpaper" setting.

Setting	State
Prevent changing color scheme	Not configured
Prevent changing theme	Not configured
Prevent changing visual style for windows and buttons	Not configured
Enable screen saver	Not configured
Prohibit selection of visual style font size	Not configured
Prevent changing color and appearance	Not configured
Prevent changing desktop background	Enabled
Prevent changing desktop icons	Not configured
Prevent changing mouse pointers	Not configured
Prevent changing screen saver	Not configured
Prevent changing sounds	Not configured
Password protect the screen saver	Not configured
Screen saver timeout	Not configured
Force specific screen saver	Not configured
Load a specific theme	Not configured
Force a specific visual style file or force Windows Classic	Not configured

For Hide Desktop Icons Policy, Navigate to User Config > Policies > Administrative Templates > Desktop

Group Policy Management Editor

File Action View Help

Student-Security-Policy [MASTER.TFSI.COM] Policy

Desktop

Hide and disable all items on the desktop

Edit [policy setting](#).

Requirements:
At least Windows 2000

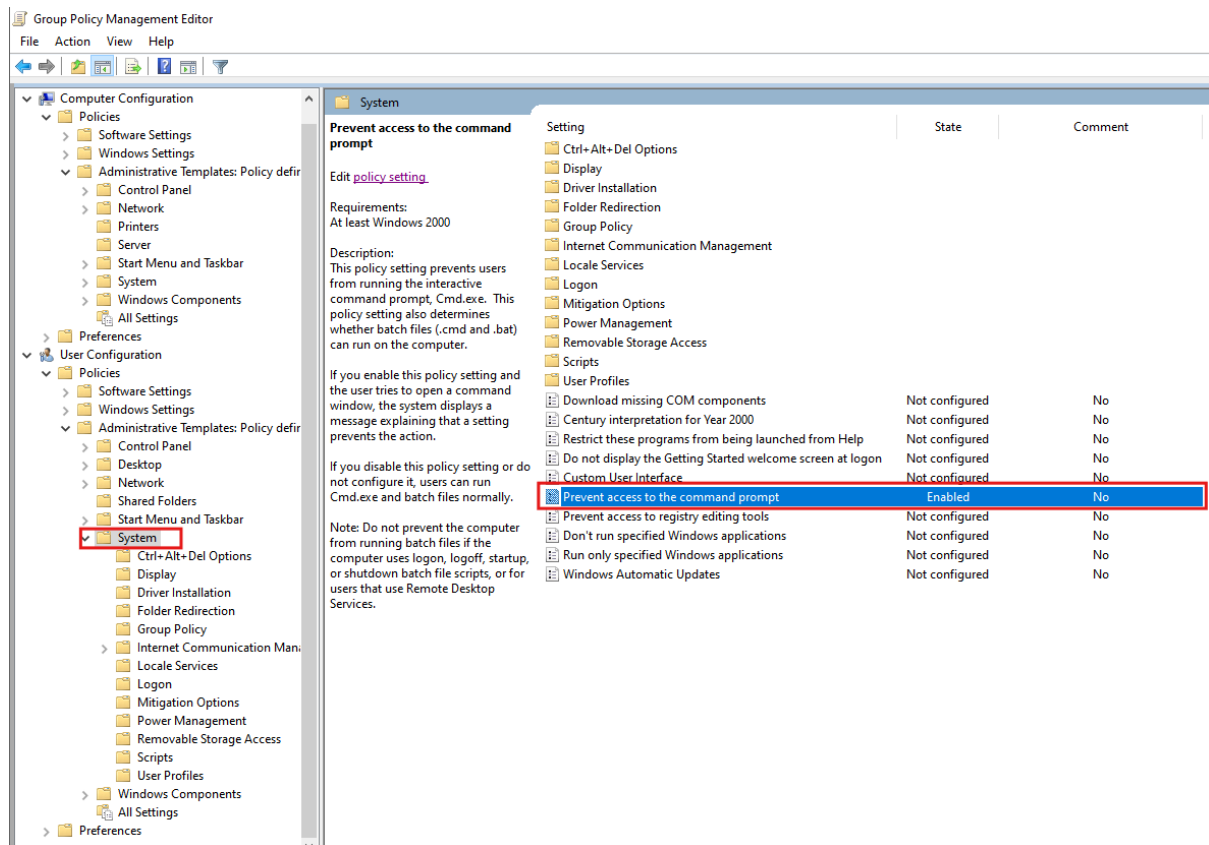

Description:
Removes icons, shortcuts, and other default and user-defined items from the desktop, including Briefcase, Recycle Bin, Computer, and Network Locations.

Removing icons and shortcuts does not prevent the user from using another method to start the programs or opening the items they represent.

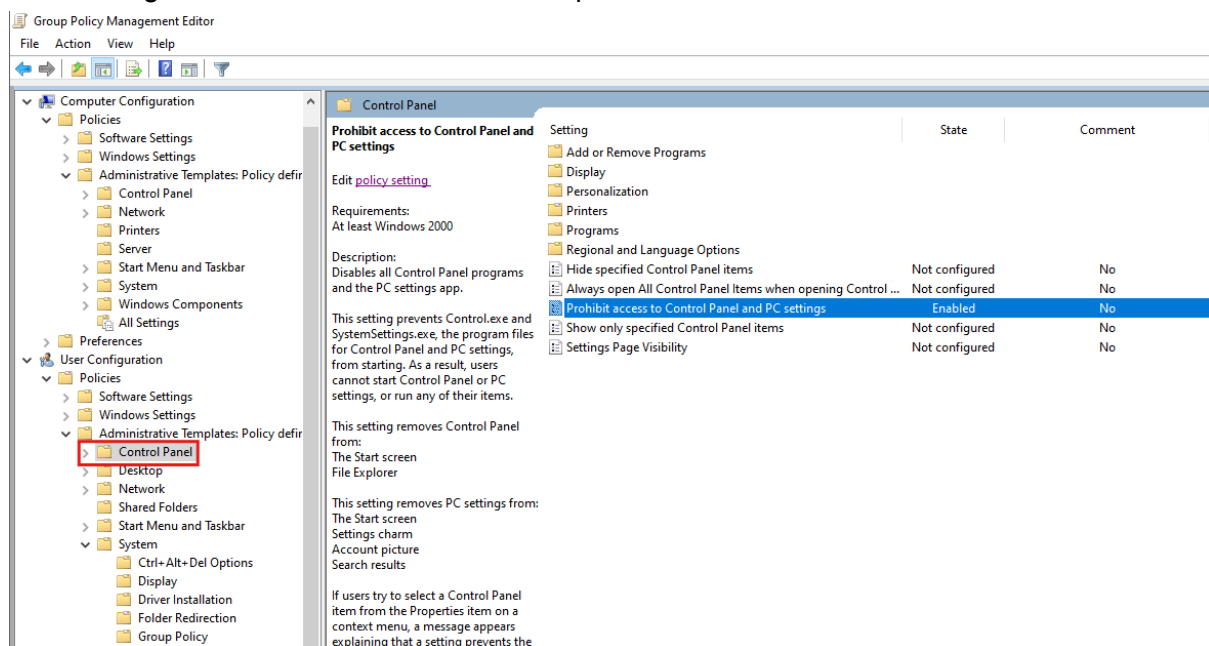

Also, see "Items displayed in Places Bar" in User Configuration\Administrative Templates\Windows Components\Common Open File Dialog to remove the Desktop icon from the Places Bar. This will help prevent users from saving data to the Desktop.

Setting	State
Active Directory	
Desktop	
Prohibit User from manually redirecting Profile Folders	Not configured
Hide and disable all items on the desktop	Enabled
Remove the Desktop Cleanup Wizard	Not configured
Hide Internet Explorer icon on desktop	Not configured
Remove Computer icon on the desktop	Not configured
Remove My Documents icon on the desktop	Not configured
Hide Network Locations icon on desktop	Not configured
Remove Properties from the Computer icon context menu	Not configured
Remove Properties from the Documents icon context menu	Not configured
Do not add shares of recently opened documents to Networ...	Not configured
Remove Recycle Bin icon from desktop	Not configured
Remove Properties from the Recycle Bin context menu	Not configured
Don't save settings at exit	Not configured
Turn off Aero Shake window minimizing mouse gesture	Not configured
Prevent adding, dragging, dropping and closing the Taskbar...	Not configured
Prohibit adjusting desktop toolbars	Not configured

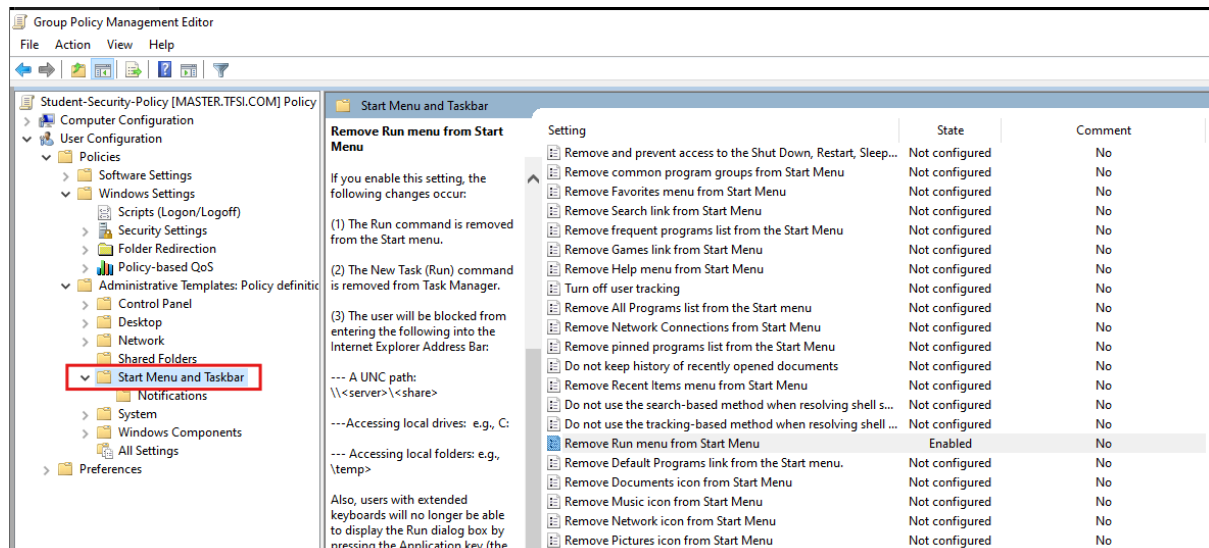

To Prevent Command Prompt Access, Navigate to User Config > Policies > Administrative Templates > System

To Prevent Control Panel Access, Navigate to User Config > Policies > Administrative Templates > Control Panel

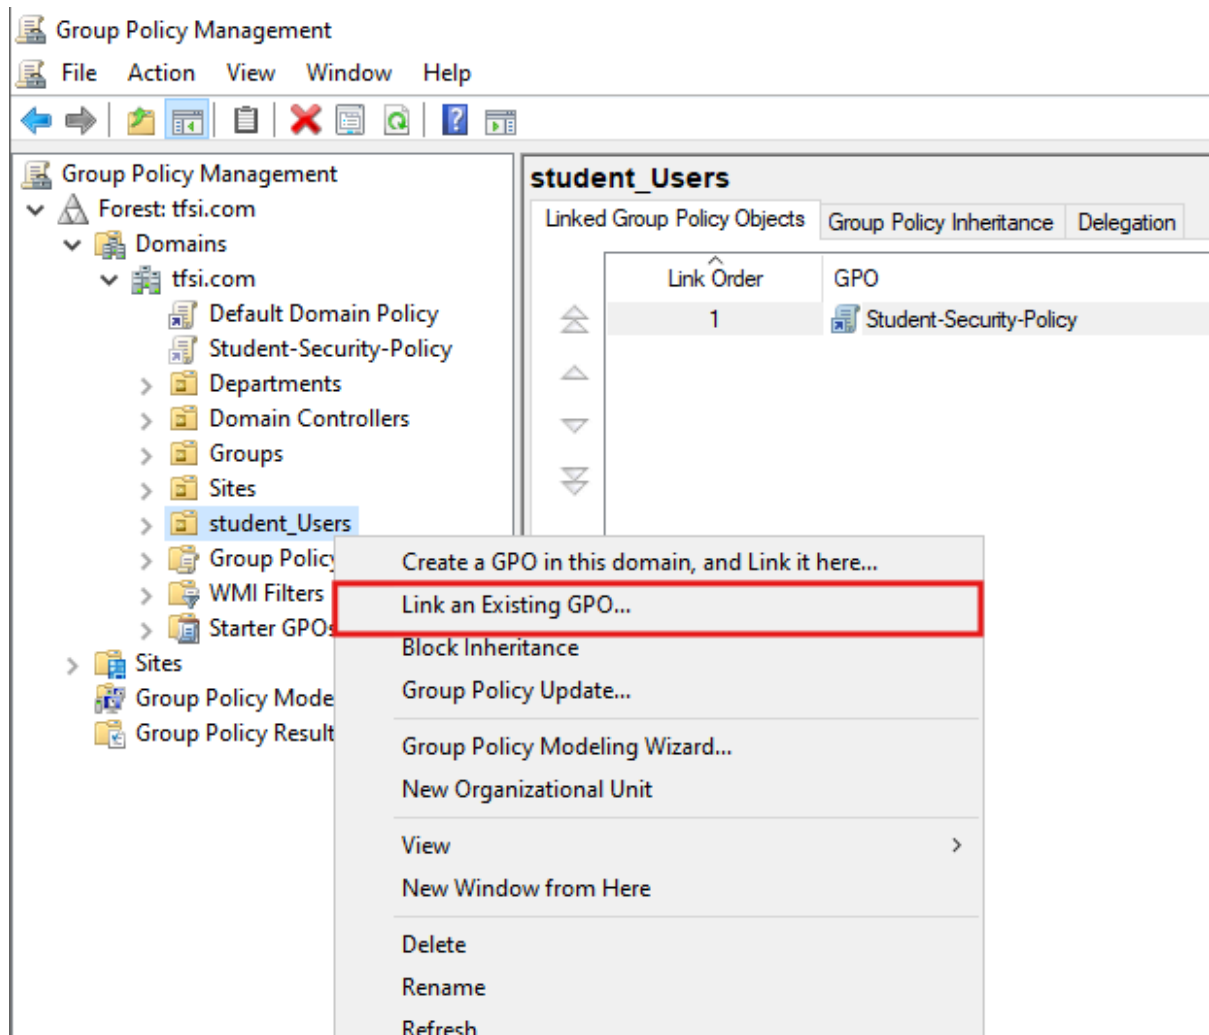

To Prevent Control Panel Access, Navigate to User Config > Policies > Administrative Templates > Start Menu and Taskbar

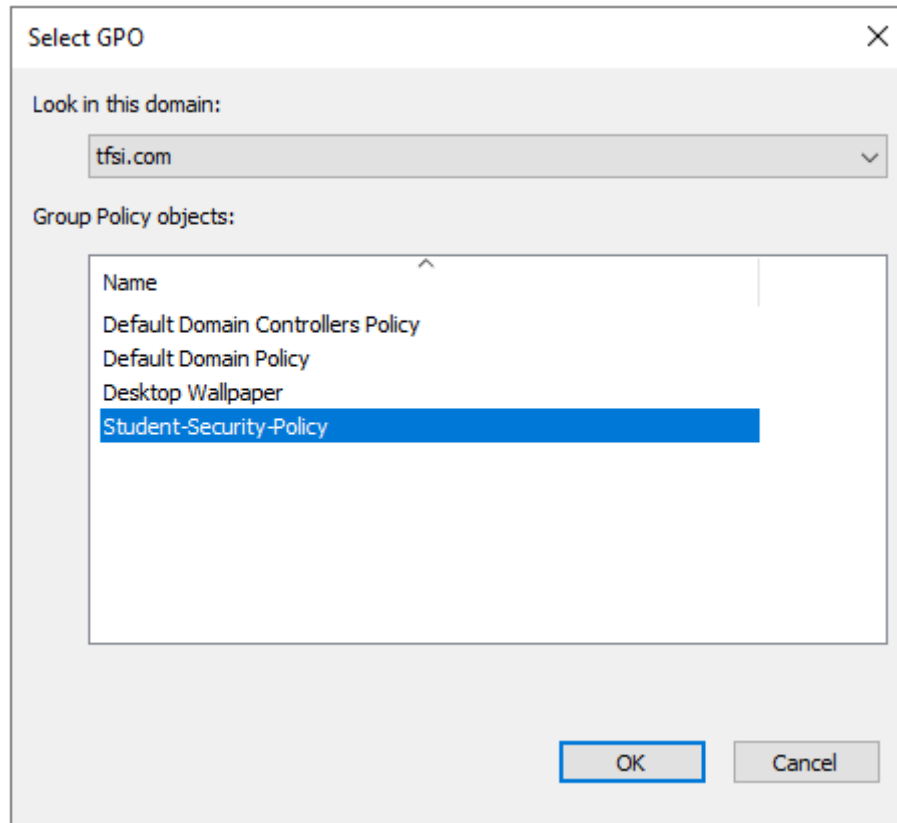

Since we create the policy in the root domain, without linking & enforcing it.

We can apply it to a specific Organizational Units (OUs) by right click on it and Linking a preexisting GPO.

Select the GPO that need to be applied & click on OK

Now run **gpupdate /force** to forcefully apply all policy changes.
The effects will be visible on user's next log on

 Administrator: Windows PowerShell

```
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

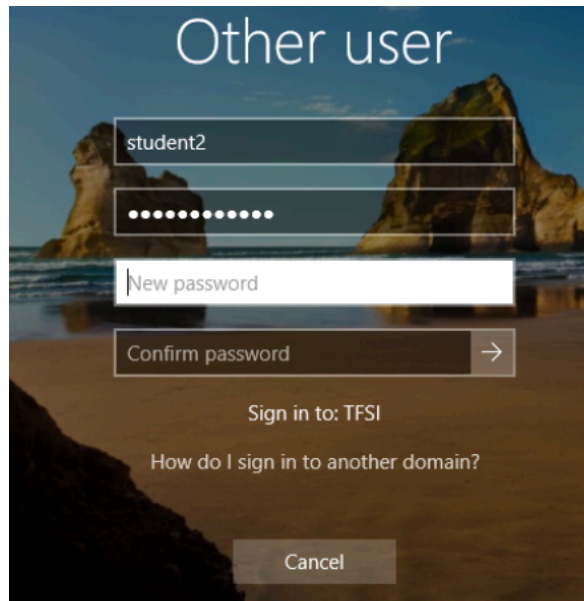

PS C:\Users\Administrator> gpupdate /force
Updating policy...

Computer Policy update has completed successfully.
User Policy update has completed successfully.

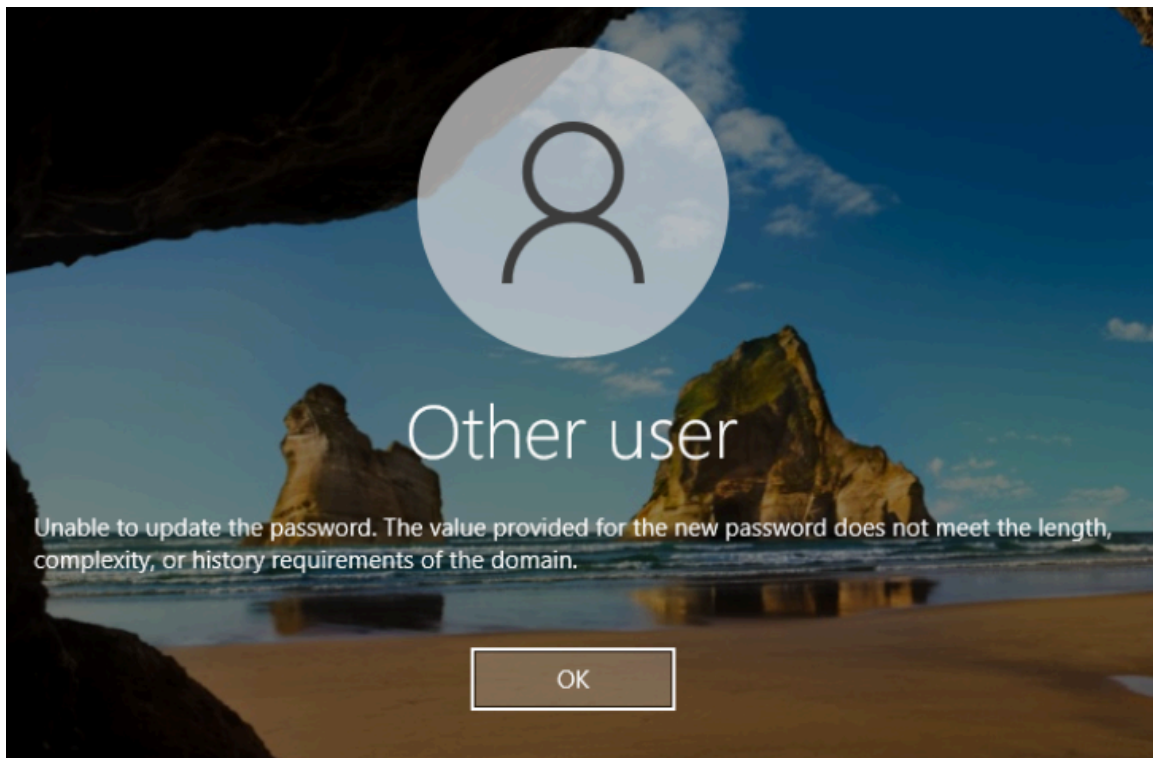

PS C:\Users\Administrator> _
```

Verification (Client Machine)

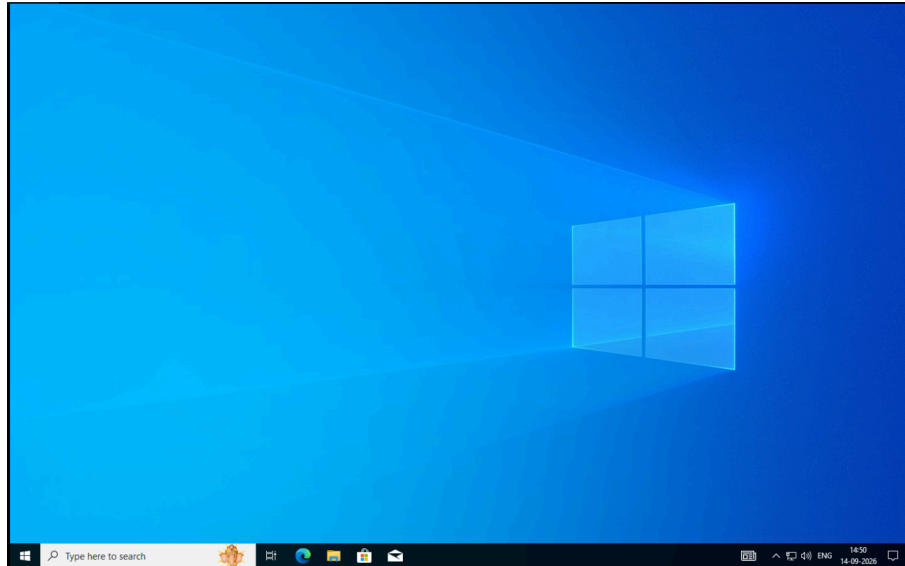

When logging in as the student user, the user was prompted to create a new password.

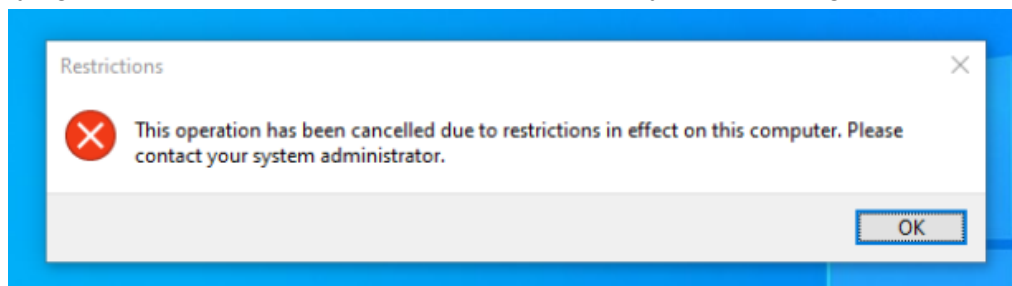

When trying to set a password that does not match the policy requirements, it fails to set that password.

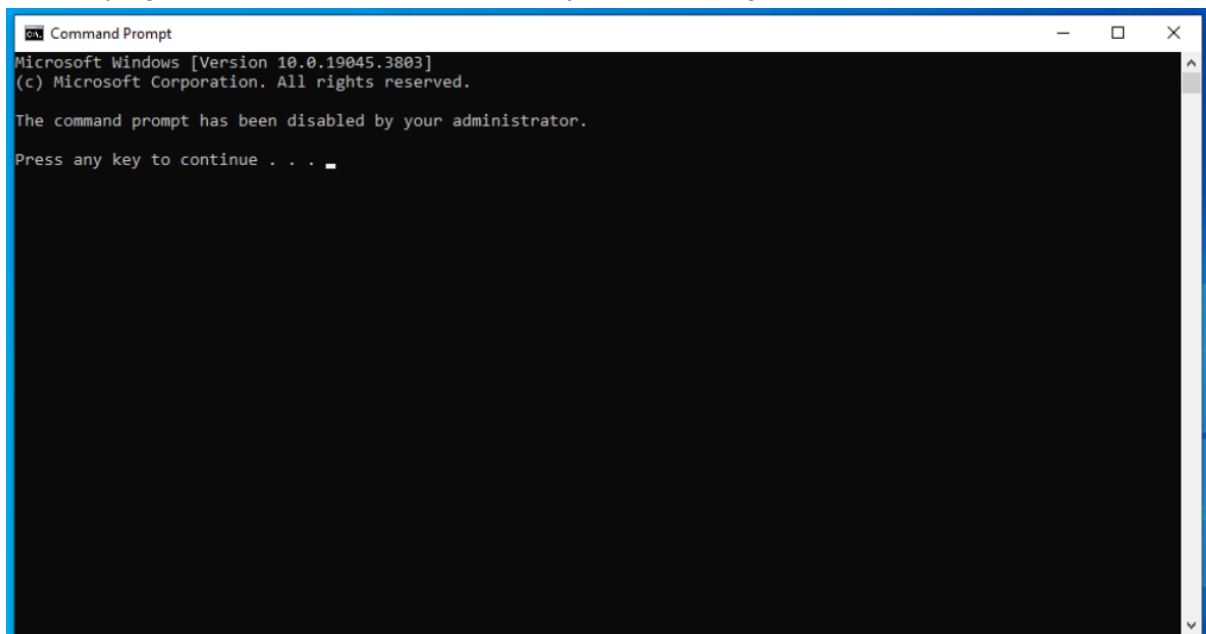

There are no icons on the desktop, not even the recycle bin.

When trying to use the RUN command, it fails and displays this message

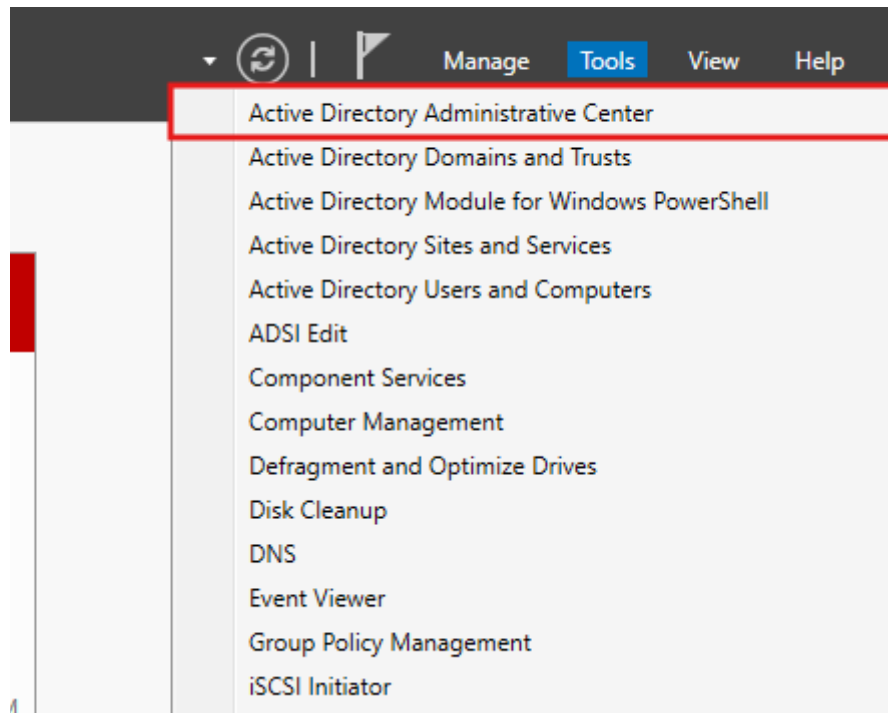

When trying to open Control Panel, it displays this message.

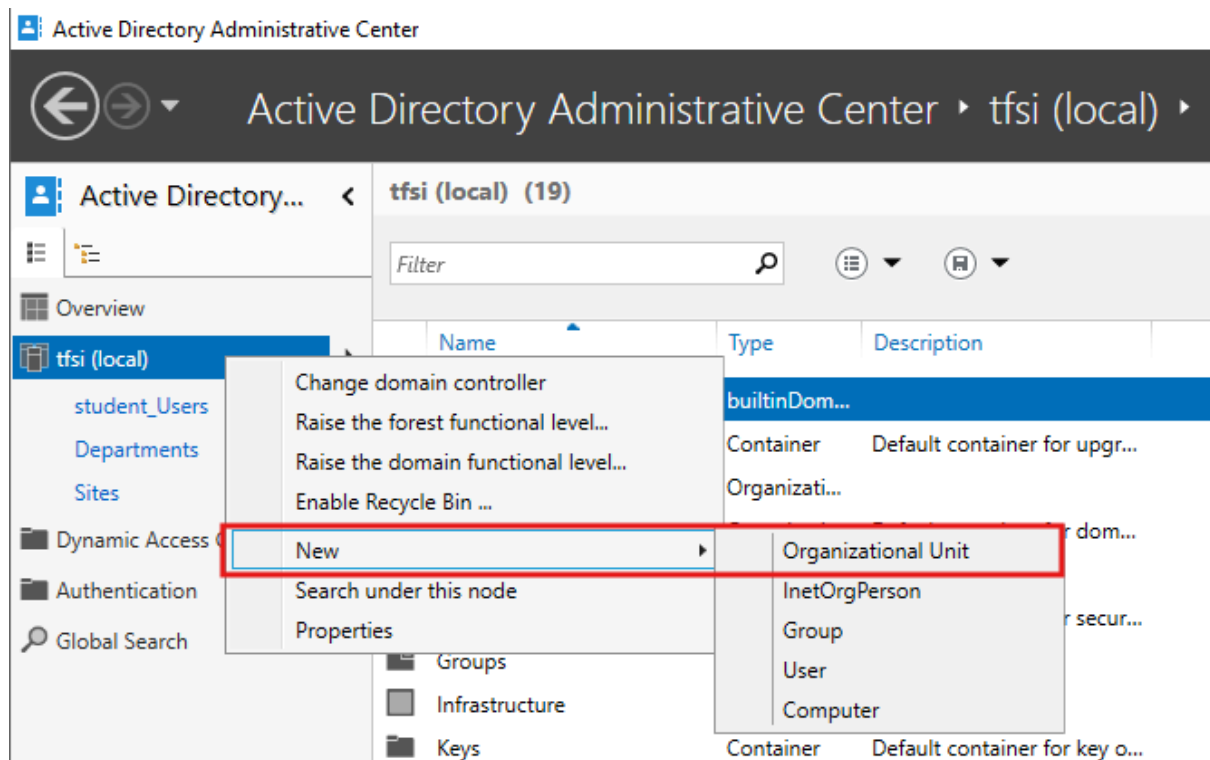

Question 2

Open Server Manager > Tools > AD Admin Center

In the local domain, right click and select New > Organizational Units

Create the Employee OU.

Create Organizational Unit: Employees

Organizational Unit

Managed By

Name: * Employees

Create in: DC=tfsi,DC=com [Change...](#)

Description:

☒ Protect from accidental deletion

Address:

Street

[More Information](#) [OK](#) [Cancel](#)

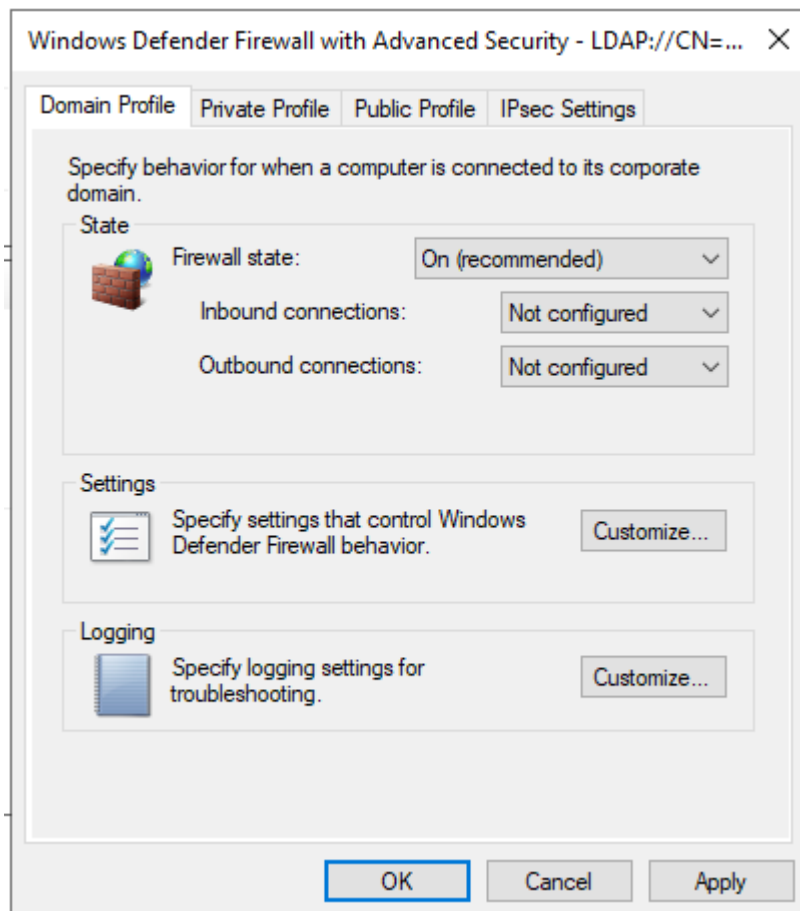

Create New Users like previously.

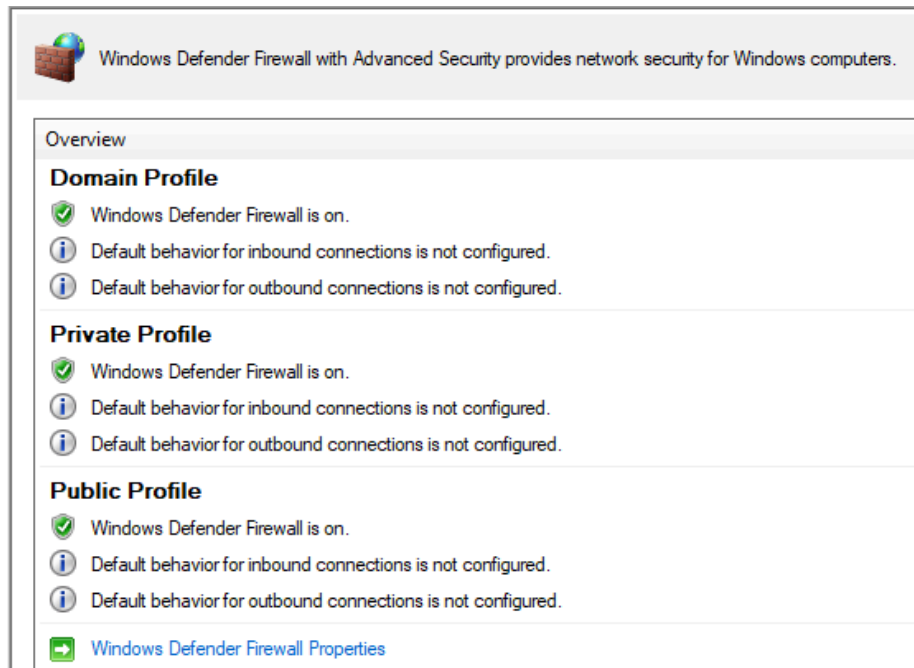

After adding a new GPO named “Employee-Firewall-Policy”. Right click and click on edit
The navigate to Computer Config > Policies > Windows settings > Security Settings > Windows Defender Firewall > Windows Defender Firewall, the click on “Windows Defender Firewall Properties”

Now for Domain, Private & Public Profile, Set the firewall state as “On (Recommended)”

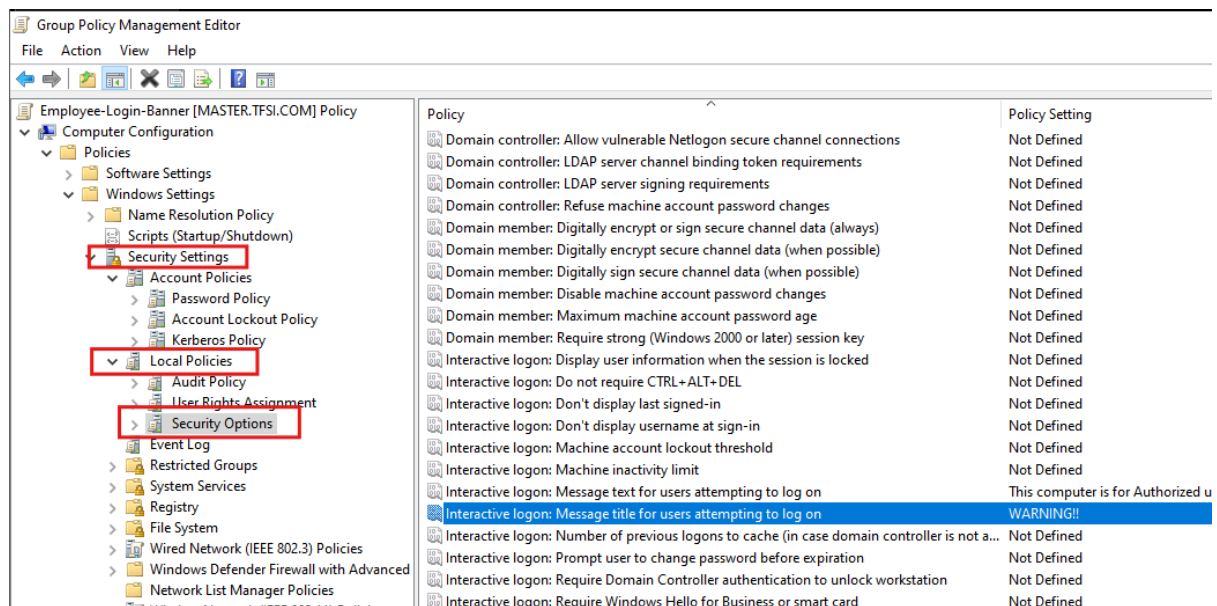

After which it should look something like this.

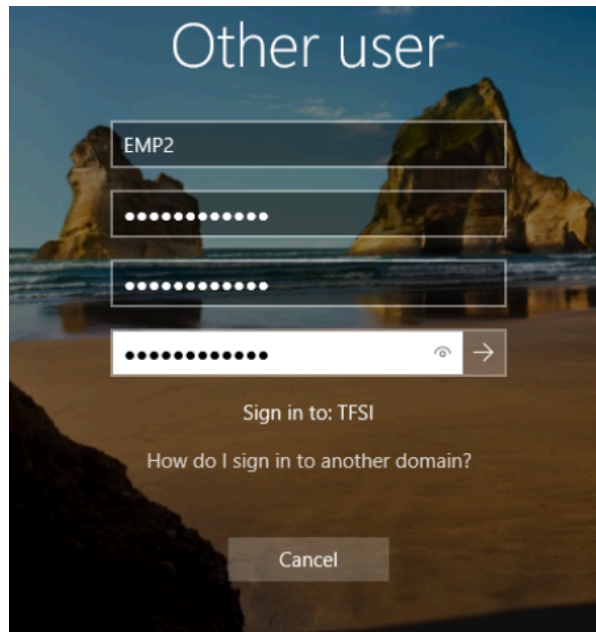

Now for logon banner message, Navigate to
Computer Config > Policies > Windows settings > Security Settings > Local Policies >
Security Options.

Set both "Interactive Logon: Message Text" & "Interactive Logon: Message Title"

Verification (Clint Side)

Logging as the EMP2

This message was displayed when logging as the same user next time.
